

THE LEADING, MOST FLEXIBLE SIGN DESIGN PROGRAM

KeySIGN Aire is an AutoCAD add-on, providing a suite of automation tools focussed on the design rules for direction signing. It is non-technical and user friendly software based on a 'What you see is what you get' approach.

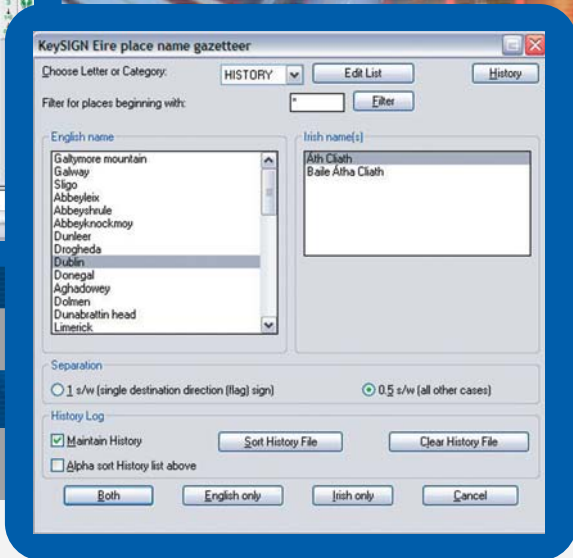

With KeySIGN Aire, the design guidance in the Traffic Signs Manual can be followed effortlessly. The software is supplied with all the correct transport fonts, standard symbols and a library of pre-designed signs.

KEYSIGN EIRE

Designs can quickly be worked up and shown as a technical drawing in full colour

Designs can quickly be worked up and shown as a technical drawing in full colour

KeySIGN Aire also comes with a wide range of tools for fine-tuning layouts, to ensure signs are aesthetically pleasing and clearly readable.

KeySIGN Aire is used throughout Eire by all the major sign designing authorities, consultants and sign manufacturers. KeySIGN contains the ideal combination of the design rules and flexibility to create every type of traffic sign quickly, accurately and with great satisfaction.

KeySIGN Aire provides the means for manufacturers to automate the cutting of sign face material, provides routines for ensuring suitable cut lines are chosen on plank constructions, and for the designer to analyse the structural post and foundation requirements of the final installations on-site.

Bilingual destinations and other text can be created from a 'gazetteer', route text, arrows and symbols are placed automatically according to the TSM rules.

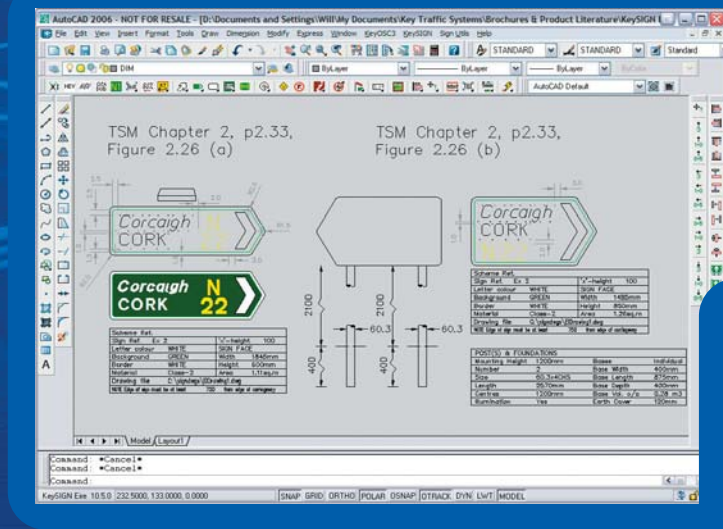

"KeySIGN Aire simplifies and automates the design of traffic signs whilst conforming to Traffic Signs Manual design rules for Eire."

Rules applying to individual sign types are applied automatically and fully detailed designs can be produced with their individual detail blocks.

Map type signs can be built effortlessly as the Rules in the Traffic Signs Manual are applied automatically.

KeySIGN Eire continues to be used by the DoE, and in the UK KeySIGN is used by the DfT for the preparation of the Traffic Signs Regulations and General Directions and Chapters of the Traffic Signs Manual, and also by the Welsh Assembly Government in preparation of the sign design rules for bilingual signs.

Designs can quickly be worked up and shown as a technical drawing in full colour

Some signs can be built automatically from dialog based entry

- Ability to create bilingual destination signs
- Enhanced full coloured design drawings
- Manufacturing directly from the design drawings is supported
- Structural design routines are included to determine the post and foundation requirements
