

TRAINING FACILITIES AT KTS HEADQUARTERS

Key Traffic Systems provide excellent training facilities for you and/or your team. Training up to a maximum of seven people, we will ensure you leave our offices fully conversant with how to use our leading edge software. We can also provide training for AutoCAD, AutoCAD MAP, and Crystal Reports. From beginners, to users who have a basic knowledge, our courses provide the delegate(s) with comprehensive up to date knowledge.

With a dedicated training suite, we can offer you the luxury of being away from the distractions often experienced in the workplace. The complete package affords excellent facilities, secure car parking, use of high specification machines, course notes, together with refreshments available throughout the day. At lunchtime, a short stroll from the suite, a country pub will provide you with a two course luncheon, using fresh local seasonal produce and caters for all dietary requirements.

Whatever your requirement may be, please contact Jane for all further details. Training can be provided uniquely for your company, or you may choose to enrol in an open course.

ON SITE TRAINING

If you prefer to undertake training at your own facilities, this can also be offered, subject to agreed training facility requirements beforehand. We can train up to a maximum of eight people, and we are able to provide all laptops with the necessary software and a projector, along with course notes.

For all prices and further details please contact jane@keytraffic.com
